

# 21ST ANNUAL BULL SALE

April 12, 2025 3pm

**Durable Cattle, Quality Genetics**  
Anderson Livestock Auction | Willard, UT

Welcome!

We would like to welcome everyone to our 21st Annual Roche Ranches Bull Sale and express our deepest gratitude to all who have supported us over the years. Your trust in our program means the world to us, and we truly appreciate each and every one of you who has purchased our bulls, relied on our genetics, and allowed us to be a part of your ranching success.

As we all know, the cattle market is absolutely on fire right now. We've all seen record prices for calves, cull bulls, and cull cows—prices we've never experienced before. It's an exciting time to be in the cattle business, and we're grateful to be part of it alongside you.

We also want to take a moment to recognize and thank the generations that came before us—those who paved the way for everything we have today. A special thank you to Grandpa and Grandma Hadfield, Grandpa and Grandma Doug and Doris Roche, and to our dad for taking the leap and purchasing the ranch in Utah back in 1992. We also owe a huge debt of gratitude to J.D. Harris, who believed in our father and provided the financing when the banks wouldn't. Without him, we wouldn't be here today.

Additionally, we want to express our appreciation for our Peruvian workers, who are the backbone of our operation. A special thank you to Gonzalo, who keeps things running smoothly at our ranch in Winnemucca, Nevada, and to Pedro and Alfredo, who do an incredible job keeping the sheep outfit running and under control. Their hard work and dedication make all the difference in our day-to-day success.

We also want to take a moment to thank all the members of our family. Working together as a family isn't always the easiest thing, but we make it work. It takes a team effort to keep everything moving forward, and we are grateful for the support and commitment of our family members who help keep the ranch running.

A special thanks goes out to Tyton Roche for his dedication and service as he serves a full-time mission in Brazil. We are thankful for him and the work he is doing.

We would also like to send a special thanks to Dallin Watts for his hard work in putting together this sale catalog. Dallin has dedicated many hours to making sure everything is done right, and we truly appreciate his time and effort in making this catalog the best it can be.

Most importantly, we want to thank God for His countless blessings. He has blessed us with this land, with the gospel of Jesus Christ, and with the moisture and resources we need to sustain our cattle and sheep. Without His hand in all of it, none of this would be possible, and nothing we do would truly matter.

As ranchers, we must continually work with nature rather than against her. It's time to shift our focus inward—to pay more attention to our own grass, range conditions, and natural resources instead of worrying about our neighbors' weaning weights. The key to long-term success in this industry isn't chasing numbers but rather improving our own rangelands, cutting unnecessary inputs, and focusing on profitability at the ranch level. Gross income might look good on paper, but net income is what keeps us in business.

Another point we want to emphasize is the level of selection that goes into our bull program. We only keep the top 10% of our male calf crop as bulls. Very few seed stock producers can say the same—most are keeping 90-95% of their bull calves. That extreme level of selection ensures that only the very best bulls make it into this sale, giving our customers genetics that will truly improve their herds.

Lastly, we want to give a huge thank you to all of our bull customers, both long-time buyers and those new to our program. Many of you have supported us for nearly two decades, and we deeply appreciate every one of you. To those who allow us to help market your calves, thank you for trusting us—we take that responsibility seriously. As always, we stand 100% behind these bulls, and if there's ever a problem in any way, shape, or form, we will make it right.

We look forward to seeing you at the sale and catching up with everyone. Thank you for your continued support, and here's to another great year in the cattle business!

Sincerely,  
Roche Ranches  
Jeff, Justin, and Dusty "Hootie" Roche

"At Roche Ranches, we stand behind our Bulls 100%. If for any reason you're not completely satisfied, we will make it right."

**-Justin Roche**

"There are a couple things about the Roche bulls that I like, we seem to have less problems with soundness without giving up marketability. They have also been a cost effective option for us."

**-Mason Warr**

"We have dealt with the Roches' for the last 10 to 12 years, their bulls have always lived up to our expectations. Their calving ease bulls that we've used have always worked well, very seldom have we had to pull a calf. It's always a plus to know that if you have a problem the Roches' will correct it. I'm sure we will continue to use them in the future. Good calves in the spring, great calves in the fall!"

**-Tracy & Jan Reese family**

"The first bull I bought for myself was a Roche bull, I have had several since. These bulls work hard and stay sound. The Roche family really helped me when our daughter was sick. I haven't forgot that."

**-Ty Reeder**

"I like buying Roche cattle because of their moderate frame. I know their cows and bulls work. They are not babied. You always know what you get when you see it."

**-Brantly hatch quarter circle H Hatch farms**

"Roche Bulls are probably the best value in our market. They combine superior durability with the emerging genetic gains in the industry."

**-Nancy McMillian**

We buy Roche bulls because they can work in any condition you throw at them. They're very solid bulls that can keep their shape year round breeding cows and the neighbors cows if needed. They've got good feet and throw the pounds to calves and very easy keeping replacement heifers. Have used roche bulls for many years and never have a problem, and if you do they make it right.

**-Conner & Craig Holmgren "Connor Cattle"**

"We have built a herd with a strong Angus base and have found that using the Roche bulls has helped us build the maternal characteristics we need will selling a calf that the buyers want."

**-Jed McMillian**

"Roche bulls are out of moderate sized range cows that work for a living, just like mine do. They are structurally correct and developed slowly to moderate condition to maximize their longevity. Roche bulls will breed more cows for more years than their competitors which gives me more bang for my bull buying dollar."

**-Joe Nield**

# TERMS & CONDITIONS:

## TERMS:

Terms of this sale are: cash or check unless arrangements are made immediately at the time prior to the sale. Settlement to be made immediately at the conclusion of the sale before animals are loaded. The right of property title shall not pass until checks have cleared.

## BIDDING:

All animals will sell as single lots to the highest bidder. Any disputes or challenges regarding bids will be settled by the auctioneer, whose decision will be final.

## RISK:

All animals are at the owner's risk prior to the sale and become the property of the buyer as soon as the animal is declared sold by the auctioneer. At that time, the buyer assumes all risk.

## ANNOUNCEMENTS:

Announcements from the auction block will take precedence over any printed matter and any other announcements.

**See Page 37 For  
Instructions**

**Livestock Auction**

**ALL NEW PUREBRED PLATFORM**

**Bid.SuperiorLivestock.com**

## LIABILITIES:

Although incidents at livestock sales seldom occur, everyone attending this sale does so at their own risk. The owners and employees assume no liability, legal or otherwise, in the event of an accident, bodily injury, theft, act of God, errors in catalogs or omissions, or percentage verification. We try to keep the most accurate records possible and have bull-tight fences, but on a rare occasion, accidents of breeding occur that we are not aware of or cannot control. We will do everything we can to determine the correct percentage, but cannot guarantee it.

## ABSENTEE BIDDING:

If you are unable to attend the sale but would like to be on the lots offered we encourage you to call prior to sale day. Bids will be handled with the strictest of confidentiality.

## TRUCKING:

All trucking is the responsibility of the buyer, but we will help make arrangements. Every effort will be made to minimize costs to the buyer. We will deliver the bulls to a central location for free.

## GUARANTEE:

Every bull has been tested for Trich and semen evaluated by a licensed veterinarian. We will guarantee the bull selling in this sale to be fertile at the time of sale.

## HEALTH:

Every bull in this sale, to the best of our knowledge, is free of any disease and will be eligible for interstate transport. All bulls were Dectomax treated. They have been vaccinated twice for Enforce 3, IBR, BVD, BRSV, 8-way Blackleg, One Shot Pasteurella, plus.

## CONTRACT:

The above Terms and Conditions of this sale shall constitute a contract between buyer and seller and be equally binding on both. Animals that are resold following the sale shall constitute a separate transaction and the rights and obligations of the two parties connected thereto are not covered by these terms and conditions.

Luci with newborn calf Clear Creek, Nevada

## Cow Information

We will be offering 40-50 head of 3-4-year-old cows, many pairs and heavy breeds. All of these cows will be breed by Roche Ranches herd bulls and a select few AI bred to select sires standout Coleman Easy Decision who is a purebred angus bull. These cows are for sale, based solely on frame size, they are a tick large for our operation, they will mature into 1,300-1,400 lb. cows. They have foraged the majority of their lives and have been fed very few times. These cattle know how to range out and make a living with what your range will provide. They have learned to use snow for water in the winter, and they know how to work in short grass and graze brush. The pairs will have matching tag numbers with dams and calves will be slick and non-vaccinated. Bred cows will be confirmed pregnant by Dr. Ira Mikelsen, and will sell in groups according pregnancy status. All cows will be poured and will have received a modified live Vibrio/ Lepto shot and 8-way. Bid confidently on a really nice set of cows that have their whole life ahead of them.

## 2-Year-Old Bulls

Lots 1-25 represent one of the best sets of two-year-old bulls we have ever offered. We are very excited for you to evaluate this tremendous group. All bulls have been trich and semen tested by Dr. Ira Mickelsen, ensuring their fertility and readiness for breeding season.

These bulls worked as yearlings, primarily in the Nevada desert and on our Utah ranch, proving their ability to handle rigorous conditions. With their strong, hard-footed structure and experience, we confidently recommend them for a 40:1 breeding ratio.

It's important to emphasize that these bulls are not leftovers from last year's sale. They are some of our favorites from the 2022 calf crop, having gained valuable experience by working as yearlings. They were grazed outside until February 1st before receiving any harvested feed, meaning they may not be as large as some other two-year-old bulls at sales, but they will be sounder and better suited to service more cows.

Bid with confidence on these top-tier two-year-olds.

# Long Yearlings

Lots 26-65 unleash the mightiest crew of long yearling bulls we've ever assembled—a powerhouse lineup poised to dominate your herd! We're charging into the future, committed to delivering a massive selection of these top-tier long yearlings, and here's why they're a game-changer: they pack an unrivaled value punch. Boasting an extra 5-7 months of natural, unforced growth over spring-born yearlings, these bulls have matured into prime beef machines without ever needing grain to bulk up—just pure, rugged development forged in the wild. Their rock-solid hooves, battle-tested by a lifetime of roaming and grazing sprawling terrains, laugh at the notion of feedlot softness after 6-8 months. For association runners, these bruisers cleverly qualify as 2024-born calves, just a whisper from the cutoff. Ready to roll straight from the range, these tough-as-nails bulls outmuscle pampered feedlot yearlings, delivering the raw grit and relentless stamina to handle double the workload with swagger!

# Yearlings

Yearling Lots 69-75: Feast your eyes on this extraordinary lineup of seven spring-born yearlings, all sired by the powerhouse Schooley Standout! These seven brothers form a unique posse, genetically engineered to pack on the pounds in their calves, making them prime candidates for producers aiming to maximize beef output rather than focusing on replacement heifers—though Lot 75 stands out as a versatile maverick, a bull with rare adaptability that could shine in a variety of roles, from herd sire to multi-purpose standout. Born and raised under the unforgiving sun of the Nevada desert, these rugged yearlings are no strangers to tough conditions. They've been forged in a landscape where every blade of grass is a prize, learning early on how to hustle, thrive, and dominate in the harshest of environments. This gritty upbringing has sculpted them into resilient, hard-working bulls ready to bring that same tenacity to your operation. Whether you're looking to boost your calf crop's weight or add a touch of desert-tough versatility, these seven brothers deliver a compelling mix of performance, durability, and genetic punch that's tough to beat!

Dam: J6 1069

JC Standout 1069 brings terminal-oriented genetics designed to produce pounds of calf, not replacement females! With a WW EPD of +64 and a YW EPD of +89, he started at 78 lbs, hit 645 lbs at weaning, and reached 1190 lbs at yearling. His 34 cm scrotal circumference and 3.4 lbs/day gain make him a growth machine. Sired by Schooley Standout, this 3/5 Simmental, 1/4 Angus bull is a rising star—don't miss this opportunity!

## LOT 72

### JC Standout 194 1/2 An 1/2 Sm

03/20/2024 | BW: 72 | WW: 650 | YW: 1185

Sire: Schooley Standout

Dam: J6 194

JC Standout 194 offers lots of rib shape and tremendous performance—a pedigreed powerhouse! With a WW EPD of +62 and a YW EPD of +119, he started at 72 lbs, grew to 650 lbs at weaning, and hit 1185 lbs at yearling. His 34 cm scrotal circumference and 3.6 lbs/day gain make him a top performer. Sired by Schooley Standout, this 1/2 Angus, 1/2 Simmental bull boasts a CED of +6 and a \$B of +156—don't miss this standout!

## LOT 73

### JC Standout 1064 3/4 Sm 1/4 Bm

03/30/2024 | BW: 71 | WW: 635 | YW: 1100

Sire: Schooley Standout

Dam: J6 1064 x BM

JC Standout 1064 is a gentle, bigger-boned, and framed bull backed by a high-performance dam with just a shot of Beefmaster! With a WW EPD of +63 and a YW EPD of +86, he started at 71 lbs, grew to 635 lbs at weaning, and hit 1100 lbs at yearling. His 35 cm scrotal circumference and 3.1 lbs/day gain ensure reliability. Sired by Schooley Standout, this 3/4 Simmental, 1/4 Beefmaster bull is poised to elevate your herd—secure this gem!

## LOT 74

### J6 Standout 0207 3/4 Sm 1/4 An

03/20/2024 | BW: 64 | WW: 640 | YW: 1115

Sire: Schooley Standout

Dam: J6 0207

J6 Standout 0207, backed by a moderate-framed cow, should sire some nice replacement prospects! With a CED of +7 and a WW EPD of +58, he started at a light 64 lbs, hit 640 lbs at weaning, and reached 1115 lbs at yearling. His 34 cm scrotal circumference and 3.2 lbs/day gain make him a calving-ease standout. Sired by Schooley Standout, this 3/4 Simmental, 1/4 Angus bull blends ease and efficiency—don't let him slip away!

## J6 Standout 734 1/2 Sm 1/4 An 1/4 Char

03/25/2024 | BW: 80 | WW: 725 | YW: 1220

Sire: Schooley Standout

Dam: J6 734 x Big Ben

J6 Standout 734 is one of the most unique genetic packages we've ever offered—cool enough that if he wasn't white, I wouldn't be selling him! With a WW EPD of +68 and a YW EPD of +127, he started at 80 lbs, exploded to 725 lbs at weaning, and hit a massive 1220 lbs at yearling. His 36 cm scrotal circumference and 4.0 lbs/day gain make him a performance star. Sired by Schooley Standout and out of a tank-like dam by ABS Charolais bull Big Ben, this Half Simmental, 1/4 Angus, 1/4 Charolais bull will sire top performance and the prettiest smoke-colored females you've ever seen—perfect for Charolais breeders!

#### **VUEWING THE AUCTION ONLINE**

*The auction will be broadcast online at [Bid.SuperiorLivestock.com](http://Bid.SuperiorLivestock.com) and the pre-recorded videos will be hosted there prior to and on sale day. You do not need an account or login just to watch the auction.*

#### **ONLINE BIDDING**

*Go to [Bid.SuperiorLivestock.com](http://Bid.SuperiorLivestock.com) for Superior's new online bidding platform. If you wish to bid online, you will need to create an account if you wish to bid online. If you have not registered there before you have created an account, request a buyer number (there is no registration required just to watch the auction). Most trusted cattle marketing entity in North America, Superior will then be able to bid online with the largest and most trusted cattle marketing entity in North America. Superior's new platform allows you to see both the live stream of the auction AND the pre-recorded videos on one screen at the same time!*

#### **TURN IN BIDS OVER THE PHONE**

*This is Superior's suggested bidding method for anybody who does not have consistent, high-speed internet. You still must register an account at [Bid.SuperiorLivestock.com](http://Bid.SuperiorLivestock.com) and request a buyer number and upon doing so you will see the bid line phone number. Just watch the auction online and call in at least 2 lots ahead of the lot you are looking to bid on.*

**FOR HELP WITH REGISTRATION OR ANY PART OF THE BIDDING PROCESS  
PLEASE CALL SUPERIOR AT (800) 422-2117.**

We thank our sponsors that help make this possible. We appreciate how much they look out for us and help our ranch thrive.

## WE PROVIDE OUR SERVICE

### Aerial Application

1

We are industry leaders in applying rangeland seed, granular herbicides and fertilizers. As well as spraying rangeland and croplands with our fleet of Agras Drones.

### Agronomy Sales

2

We stock, mix, deliver and/or apply all of your favorite seed kinds, varieties and NRCS prescription mixes. We also carry fertilizer and pesticides.

### Consulting

3

From soil samples to crop monitoring and planning, Mtn Meadow Ag has you "COVERED". Call us anytime to see if we are a good fit for your operation.

## PRODUCTS

- Small Grains
- Alfalfas
- Pasture Mixes
- NRCS Mixes
- Natives
- Fertilizer Blends
- Pesticides
- Custom Aerial Applications  
(starting at \$15 per acre)

**EPD - Expected Progeny Difference:** The expected difference in performance of a bull's progeny compared to the performance of other sires. In other words, EPDs for an individual are meaningful only when they are compared to EPDs of other bulls. If a bull has a birth weight EPD of 4.0 and Sire B has a birth weight EPD of 2.0, then calves from Sire A would be expected to average 2 pounds heavier at birth than calves from Sire B if the bulls are randomly mated in the same herd. EPDs are designed to compare sires within the same breed.

**Acc. - Accuracy** - A measure of reliability of an EPD expressed between 0 and 1. Accuracies closer to 1.0 means the EPD is a more reliable estimate of a sire's true genetic value for the trait.

**% Rank.** - Based on percentages, this indicates where a bull's EPD ranks him in the entire population of his respective breed.

**CED or CE - Calving Ease Direct:** Is the difference in percentage of unassisted births when a sire is bred to first calf heifers. A higher number is desirable.

**BW - Birth Weight EPD** predicts the difference in average birth weight of a bull's calves compared to calves of another bull. Reported in pounds, a lower number is desirable.

**WW - Weaning Weight EPD** predicts the difference in average 205-day weight of a bull's progeny compared to calves of another bull. Reported in pounds, a higher number is desirable.

**YW - Yearling Weight EPD** predicts the difference in average 365-day weight of a bull's progeny compared to progeny of another bull. Reported in pounds, a higher number is generally desirable.

**YH - Scrotal Circumference** - The SC EPD predicts the difference in yearling scrotal circumference of a bull's progeny compared to progeny of another bull. Reported in inches, this is usually a secondary trait depending on production environment.

**SC - Scrotal Circumference** - The SC EPD predicts the difference in yearling scrotal circumference of a bull's progeny compared to progeny of another bull. Reported in centimeters, a larger number is desirable.

**CEM or MC - Calving Ease Maternal** is expressed as a difference in percentage of unassisted births of a sire's daughters as first-calf heifers when compared to daughters of other sires. Reported as a percentage, a higher value is desirable.

**Milk** - The Milk EPD predicts the difference in average 205-day weight of a bull's daughters' calves compared to the calves from daughters of another bull. Reported in pounds, ideal milk values depend heavily upon the nutritional environment of the herd..

**MWW - Maternal Weaning Weight** (Simmental)

**M&G - Milk and Growth** (Hereford)

**TM - Total Maternal** (Red Angus)

The EPD predicts the weaning weight of a bull's daughters' progeny and reflects both the milking ability of a bull's daughters and the growth potential of their calves. Reported in pounds, higher numbers are generally desirable.

**\$EN - Cow Energy Value** (Angus): expressed in dollars saved per cow per year, the EPD assesses differences in cow maintenance requirements for daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved per cow per year).

**CW - Carcass Weight EPD:** predicts the difference in hot carcass weight of a bull's progeny compared to progeny of another bull. Reported as a percentage, a higher number is desirable.

**Marb - Marbling:** The EPD predicts the difference in average USDA marbling score of a bull's progeny compared to progeny of another bull at a similar end point. Reported in degrees of marbling, higher numbers are desirable

**RE - Ribeye Area:** The EPD predicts the difference in average ribeye area of a bull's progeny compared to the progeny of another bull at a similar end point. Reported in square inches, a larger number is generally desirable.

**Fat** - The EPD predicts the difference in average fat thickness at the 12th rib of a bull's progeny compared to progeny of another bull. Reported in inches, a smaller number is generally desirable.

**Stay** - The EPD predicts the difference in percentage of daughters of a bull that remain in the herd past six years of age compared to daughters of another bull. Reported in percentage points, a higher value is desirable.

**YG - Yield Grade** (Simmental) - The EPD predicts differences in USDA Yield Grade of a bull's progeny compared to progeny of another bull. Reported in tenths of a USDA YG, lower numbers are desirable.

**\$Value Indexes** (Angus)

**Weaned Calf Value (\$W):** an index value expressed in dollars per head, is the expected difference in value of a bull's progeny at weaning compared to progeny of another sire. \$W accounts for differences in birth weight, weaning weight, maternal milk, and mature cow weight.

**Feedlot Value (\$F):** an index value expressed in dollars per head, is the expected difference in value of a bull's progeny for postweaning feedlot performance compared to progeny of another sire.

**Grid Value (\$G):** an index value expressed in dollars per head, is the expected difference in value of a bull's progeny when sold on a carcass grid basis compared to progeny of another sire.

**Beef Value (\$B):** an index value expressed in dollars per head, is the expected difference in value of a bull's progeny for postweaning growth and carcass value compared to progeny of another sire.

**Indexes** (Simmental)

**All-Purpose Index (API):** expressed in net dollars returned per cow exposed, evaluates Simmental bulls being used on the entire cowherd (bred to both Angus first-calf heifers and mature cows). Focuses on balanced traits including growth, maternal, and carcass merit with moderate emphasis on maternal traits and yield grade.

**Terminal Index (TI):** expressed in net dollars returned per cow exposed, evaluates the merit of Simmental sires when bred to mature Angus cows and all progeny are fed and harvested. Focuses on postweaning growth and efficiency with strong emphasis on carcass merit.

**\$CEZ - (\$ Calving Ease)** (This index assumes a bull will only be mated to heifers, not cows. The potential profitability of the sire is measured by the influence it has on a progeny's birth weight, mature size, and calving ease. This index also measures a cowherd's ability to perform with yearling performance. \$CEZ may cause unwanted deposition of weaning.)

**\$F (Feedlot)** Similar to a Terminal Sire index, this index will be mated to a mix of heifer and cowherd and carcass traits. This multi-trait index assumes when progeny are sold on the fed market and cows and attempts to measure profitability closely when selecting for \$F. Over-selection may cause detriment harm to longevity, reproductive efficiency and fleshing ability.

**\$BMI - (British Maternal Index)** As the name implies, complimenting the British cow base attempts to measure a bull's potential profitability when likely to be gauged at adding value to Angus, Red Angus, Hereford, etc.. Shorthorn females can likewise be gauged at adding value to British composite bulls of other breeds. A balance of growth and carcass traits is desired with a strong maternal component aimed at optimum reproductive efficiency and cow longevity.
